Chineway's technical service alliance will provide you with comprehensive professional technical support

Chineway's experienced technical service team can provide technical support in the instant-release and controlled release oral solid dosage and liquid dosage (injection and oral, topical liquid formulation). The support include formulation and process optimization, functional excipients application guidance, film coating selection and scale-up process support. We offer complete solution in our laboratory and in customer's production.

However, functional excipients is an applied science, with the deepening of applied research, we will find more new applications which will help customers solve difficult problems, therefore, just using Chineway's lab for the application of technology may not be comprehensive and systematic in reviewing new application features. With many years of wide industrial contacts, Chineway has established a **"new functional excipients application research technology alliance"**. This alliance can provide you more than ever before resources to help you accelerate product development and launch to market. Our technology alliance partners share our vision to develop higher quality and more technically advanced pharmaceuticals, to contribute our strength and passion to Chinese health. Let us join hands to work together to explore application of new materials science!

Our **"new functional excipients application research technology alliance"**, will also include Chineway's global partners, such as FUJI Chemicals Lab in Japan will also provide some advanced application research results in the Japanese market for us to share; Ashland's (ISP & Aqualon) laboratory in Shanghai will also assist customers with the application guidance on their of polymer materials; Lubrizol's Asia-Pacific application laboratory will provide effective guidance for Carbopol polymers

We turn your formulation problems into solutions save yourself the surprises when you're looking for a partner, come straight to Chineway...
